Today, we are offering insight into some of the jobs that are predicted to become more in demand over the coming years.

### Jobs In Health Care:

The healthcare field is ever-growing. With the baby boomer generation aging, there is an incredibly high need for many health care jobs.

Health care is one of the fields with the highest demand and that trend is likely to continue for years to come. If you are trying to decide what field to go into, consider a job in health care.

Here are some of the high demand healthcare jobs:

Registered Nurse

RN's are an unbelievably important part of the healthcare system. Nurses are the people who spend the most time with patients and take care of their needs.

Nurses are professionals who care for people whether it is in a hospital or a clinic.

Becoming an RN can take between 2 and 4 years of university. According to [Indeed](#), the average nurse in California makes about \$91,386.

## Physical Therapist

Another high demand career path in the healthcare field is physical therapists. Physical therapists can help people with a huge variety of bodily issues.

To become a physical therapist you need to earn a doctor of physical therapy degree. The average yearly salary for a Physical therapist is \$91,488.

## Home Health Aide

Home Health Aides have been in very high demand over the last few years and will continue to be as the older generations need care.

A home health aide makes about \$48,000 a year. To become a home health aide you typically only need a high school diploma or a GED. On the job training is offered.

## Jobs In Technology:

Another field that is booming and growing every year is technology. In our society technology is ever expanding and changing.

There is a big need for people with the knowledge and skills in various technology areas. If you have an inclination toward technology then you may want to consider this ever expanding field.

## Web Developer

A web developer is involved in the technical part of creating websites. Many companies will hire web developers.

Web developers are in high demand!

To become a web developer you need at least an associate's degree and a lot of skill. The average web developer makes around \$72,000, although this can vary a lot.

## Software Developer

Software developers are also in high demand as our world becomes more and more technology focused.

According to Rasmussen University, software developers are masterminds who create the various computer programs we use every day. From apps to huge networks or programs.

The average salary for a software developer is about \$103,000. The typical software developer will have a bachelor's degree and a lot of learned skills and experience.

## Other Hollister CA Jobs In Demand:

The health field and technology field are two areas that have a lot of demand right now. However, that does not mean there are not great high demand job opportunities outside of those fields.

There are plenty of other high demand jobs in other fields. Here are some examples of other high demand jobs:

### Financial Advisor

A financial advisor helps people with their money. They may help them decide where to invest and how to manage their money.

With more high paying jobs in this century and more knowledge that investing is important, financial advisors are becoming more in demand than ever.

A financial advisor will typically need a bachelor's degree. They can make an average salary of \$70,000.

### Construction Worker

The world is always developing and construction workers are an incredibly important part of that. There has been a lack of skilled laborers in recent years that has caused a big demand for construction workers.

Construction worker's level of education depends on the company. Often internships at trade schools are needed. At times there is no experience needed and on the job training is offered.
